

"Start Doubling Your Leads & Sales Fast By Boosting 'Live Chat' With Chatbots!"

['Quick Start' Guide]

Plus!

"How To Add Tidio Chat & Chatbots To Your Website!"

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

Hello and Welcome!

My name is Mark Huber hailing from beautiful Vancouver Canada where I head up SuccessOnTheFly Marketing, a boutique agency that specializes in helping businesses generate more revenue fast through the power of chat messaging, chatbots, interactive media & conversational marketing.

Did you know that up to 98% of your website visitors leave without doing anything?

Is that something that you're comfortable with?

With live chat & chatbots, you can keep visitors on your website longer by being more helpful in answering their questions that will result in generating more leads & sales faster.

But first, let's answer the **#1 question we are asked.**

"I like the idea of chat because I actually use it when I'm online too. But as a business owner **do I/we have to always be available online with chat?**"

Our answer...

No. You can set your own schedule and be available only during specific days or hours (or not!). You can also set up a simple system where you automatically collect name, phone number & email and get back to your visitor at a time that is more convenient for you. You can also send automatic messages and auto-responses to frequently asked questions. After a while, you'll see what works best for your business while still being helpful and 'available' online for your visitors & customers 24/7.

We help businesses double their onsite leads & sales fast through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>

Here are some compelling facts why 'chat' is such a big deal and why you need to climb on board before your competition does...

77% of consumers state that they won't make a purchase if live chat support is not an option.

Only 6% of millennials will call a company for customer service

53% of customers would prefer to use web chat before contacting a company

70% of consumers choose "message us" buttons over "call us" buttons

79% of customers are more loyal to brands that are easy to contact

51% use chat because they can multi-task

46% found chat to be the most efficient communication method

Customers overwhelmingly say they trust businesses more when they can message them

79% of businesses said that implementing chat resulted in increased customer loyalty, sales and revenue!

30% of companies who've been using chat for less than 1 year claim to have seen a 5-10% increase or more in their revenue

That said:

You're here because you're probably not using chat on your website right now and you're looking for a 'new' unfair advantage over the competition?

Thanks to onsite chat, the days of waiting for an e-mail reply or a phone call are a thing of the past.

It's a great tool for creating a closer relationship with your customers and assisting them whenever they need it.

A website that offers a chat platform let's your 'ideal people' know that your 'there'; 'aware' and 'care'!

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

The added benefits are that a website that has a chat platform that's boosted with chatbots decreases bounce rates; increases customer engagement & your sales!

Win - Win!

Looking to boost your online business?

Want to stay ahead of your competitors?

Want more leads? Here's how...

We help businesses double their onsite leads & sales fast through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>

40% increase in online leads with live chat

Are you offering your site visitors exactly what you look for when you are online?

We help businesses double their onsite leads & sales fast through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>

Potential Benefits of Chatbots

If chatbots were available (and working effectively) for the online services that you use, which of these benefits would you expect to enjoy?

2018 State of Chatbots Report

Your next wave of growth could come from smart, directed conversational experiences where you communicate quickly with your visitors in real time, and convert them into buyers.

If I'm on your 'home page' what would I see?

Your website is pretty, but so is your competitor's.

You've got great content, but so does the competition.

You're in a field with a lot of great companies offering the same services you do!

But how do you stand out?

Do you currently provide easy ways to engage your onsite visitors to learn more & buy from you?

We help businesses double their onsite leads & sales fast through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>

Why Companies Use Live Chat

Fact: 91% of consumers actually want immediate, personalized ways to engage before buying

Do you offer modern day communication platforms your visitors actually expect & are happy to engage with?

With an average 68% conversion rate chat is an absolute must for businesses looking for a new 'unfair advantage' and edge over the competition.

We help businesses double their onsite leads & sales fast through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>

Live Chat's Impact On Conversion Rates

77% of customers won't make a purchase on a website if there's no live chat option available.

60% of customers were more likely to return to a website that offers live chat support.

85% of 'chatters' are more likely to convert into customers.

We help businesses double their onsite leads & sales fast through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>

of customers are always
on the lookout for real-time
customer service

of customers return
to website with live chat
support

Chat makes for amazing customer service and helps you to find out what your customers are actually curious about, what they need to know before committing to a purchase, and instils confidence in them that you or your support team are really behind your brand and business.

Over the past few years, I have spent countless hours testing different chat options.

From general user experience, to testing how quickly they load, to design and functionality, price & options for it to scale and be customised depending on what you are offering and trying to achieve.

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

From 2015 to 2018 the use of live chat grew by nearly 400%

And (*spoiler alert), I have found one live chat that excels in almost every area in comparison to other chat platforms.

The Solution To Live Chat: Tidio

Why I am telling you this? Because I have a solution.

As I said, this led me to explore alternatives.

And hands down I found the one that was the most affordable, worked perfectly, was scalable and, more importantly, didn't slow down my website loading time was Tidio Chat.

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

They not only offer a free forever version, but their premium plans are extremely affordable for what they include

[Click Here](#) to create your FREE Tidio account

FYI: [Tidio](#) is a live chat platform that's boosted with chatbots to increase your sales & customer engagement even faster. Hands down we've found Tidio Chat to be the most robust & capable of all the alternatives out there. And believe me – we've tried all the top named platforms out! We are always proud to introduce Tidio to our audience through our 'affiliate link'. If you decide to upgrade your FREE account to one of Tidio's paid plans it costs you no more. If you do purchase we may receive a small compensation for the 'referral'. You probably already knew that but we just wanted to be totally transparent & crystal clear on that!

So, exactly what are the benefits of live chat?

With live chat on your website, you can:

- Connect & Engage In Real Time
- Reduce Forms & 'Cart Abandonment'
- Deliver Accessible, Convenient & Fast Support
- Boost your Conversions
- Increase Your Customers' Loyalty
- Save Money
- Collect Useful Data About Your Customers
- Troubleshoot Faster & Better
- Reach More Customers
- Collect Instant Feedback
- Automate Customer FAQs
- Deliver A Personalized 'Real Time (& Automated) Customer Experience
- And More...

But, isn't that the same as all live chat? Granted, yes.

So, what exactly set's Tidio apart? Let's look at the 3 biggest benefits we have discovered...

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

The Tidio Difference

1- Site Speed

One of the greatest technical aspects that affect your website's ability to work for you is site speed. For every three seconds of a page loading, you will lose just over half of all visitors.

To put it another way, for every second of impatient agony you're causing visitors with slow load times, you're losing conversions and profit. Site speed is INTEGRAL.

The more functions, features and integrations your website has the 'heavier' your site will be and generally the slower it will load.

As a start point you want your site to be loading without Chat, Google Analytics & Tag Manager Codes, YouTube Video Embeds or Facebook Pixels to be fully loaded in between 1 – 3 seconds max! Adding live chat adds roughly 5 – 6 seconds (for a good one like Tidio) and we've seen 7 – 10 seconds for most other chats.

Almost every website we've seen with live chat has an average load time of between 11 and 18 seconds, we even saw one where the chat led to a 30 second load time! And when we take off those live chats the load time drops by 10, 15 and even 18 seconds! That is massive!

However Tidio seems to be a lot lighter than any other live chat plugins!

2 - Simplified Communication

Tidio provides a web app and a desktop app that serves as a central hub for most of your communication.

I'm talking chat inquiries, email campaigns, Facebook Messenger chats.

Yes, you read that right!

You can integrate Facebook Messenger into Tidio so that any time a customer messages you on Facebook it shows up in your Tidio inbox for you to respond to without the need of having ANOTHER tab open just for that.

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

This gets super powerful when you create Chatbots; Facebook Messenger chatbots anyone?! (Yes, we do that too!)

It gets better.

Imagine a customer is on your site. You can see what page that customer is on and can initiate a chat with them based on that page (although, this could be creepy).

You can set up a pre-chat survey to collect their email address which then automatically tags them as a 'Lead' in your Tidio contact list.

As you are chatting you can see what the user is typing before they even send the message (weird, I know) and get your response ready beforehand or, better yet, just use a pre-written 'quick response'.

Maybe you don't know the answer? Just reassign them to another operator who does or tell them you will send them an email with the answer, which you can do straight from Tidio... even after the chat has ended.

Yes, Tidio can send emails.

And you can quickly also set up a chatbot to automatically answer some of your visitors more frequently asked questions (FAQs).

That's just the beginning of how Tidio simplifies communication.

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

3 - Chatbots (aka. Free Money)

Now, this is where Tidio shines brightest. Just consider the pros and cons of live chat and chatbots...

Live Chat Pros

- ✓ One support agent can handle multiple tasks
- ✓ A live chat operator can give personalised assistance
- ✓ Support agents know how to carry a conversation

Live Chat Cons

- ✗ Handling more than 3 customers at the same time can be tricky
- ✗ Sometimes writing back can take some time & customers need to wait
- ✗ Your support agents won't work for free & they can't answer around the clock

Chatbots Pros

- ✓ A chatbot can handle an unlimited number of customers
- ✓ No waiting time
- ✓ They don't need payment or sleep

Chatbots Cons

- ✗ They don't know how to carry a conversation
- ✗ They can personalise their answers only to a limited extent
- ✗ You need several chatbots to handle different types of requests

If you were to combine the two Pro's & Con's lists you will find that chatbots and live chat (operated by a human) compliment each other perfectly!

When you are away, chatbots still work.

When a user asks an easy question, the chatbot saves you time by answering.

We help businesses double their onsite leads & sales fast through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>

If your visitor doesn't complete your online form – your chatbot can 'nudge' them back to complete it! (this alone is huge!)

Run an online store?

Chatbots can direct users to correct pages, walk them through the booking/purchase process, provide shipping updates, reduce your ecommerce cart abandonments and SO much more.

of consumers like to use
chatbots to get quick answers
to simple questions

of consumers want to
see more companies
using chatbots

Here are some compelling statistics:

Chatbots can save companies up to 30% in customer support cost,
47% of consumers are open to buying items through a chatbot,

An estimated 67% of consumers worldwide used a chatbot for
customer support in 2017.

The bottom line is this.

**You want your website to convert leads & make sales 24/7
even when 'you're away'.**

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.**
<http://SuccessOnTheFly.com>

An automated customer service chatbot does just that.

It makes you money while you're sleeping!

So, what are some scenarios where a chatbot can benefit you?

#1 – Welcoming New (or Returning) Visitors

When a visitor lands on your website a chatbot can welcome that visitor with a welcome message.

Perhaps something like “Hey, great to see you! Let me know if I can help” to create some rapport.

Or maybe they're on your pricing page and the bot says “Hey, are you interested in our product?” and when they respond positively the bot can ask for their email address and tag them to follow up in your CRM.

If a user returns Tidio recognises them!

Why not welcome them back with a discount code to encourage them to purchase; "Hey [first name], welcome back! Here's a discount code: 5%OFFMYSTUFF".

You could set that discount code to show only if that customer lands on a specific page (like a 'Pricing' page, or even if they're about to leave the page! (How cool is that!)

PRO TIP: Integrate an email drip campaign using Tidio Chatbots to warm up that lead a bit through email. If they haven't returned in 7 days the chatbot can send another discount code to their email; 10%OFFPLEASECOMEBACK.

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

#2 – Abandoned Cart or Form Reminder

A huge concern and loss of money to all businesses is when your visitor has added a product(s) to their cart and didn't check out!

According to [Moosend](#), the cart abandonment rate for the United States is slightly lower than many other regions, but fairly close to the global average.

However, Moosend also notes that [marketers who use automation tools](#) experience up to a 50 percent increase in conversion rates.

A chatbot can trigger to help answer any questions or clear up any doubts in that instant; "Hey, there are still items in your cart! Are you sure you want to leave them?"

Or "Are you sure you want to leave this form? Let us know if you need assistance."

We help businesses double their onsite leads & sales fast through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>

PRO TIP: An email can also be automatically sent to remind them if they ignore or miss the chat.

Another huge problem that chat can help solve is 'remind' your visitor to complete the form they started to fill out but didn't end up sending.

Are visitors abandoning your online forms & 'shopping carts'?

How much is forms/'cart abandonment' costing you?

If you could 're engage' just 10% how much would that be worth to you and to your bottom line?

Probably allot!

Did you know that a simple 'digital assistant' (chatbot) can detect when either of these events happen &'re engage' your visitor in 'real time' to ask "What happened?" and encourage them to complete?

Do you even know what your 'cart abandonment' rate is?

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

Here's the formula to find out:

$$\frac{(\text{Number of visitors who added item to cart} - \text{Number of successful sales})}{\text{Number of visitors who added item to the cart}} \times 100$$

For Example:

Running a Shopify store?

In your Shopify admin, go to Analytics > Dashboard.

Under the Dates section at the top, select Last 90 Days.

When the dashboard reloads, head to the Online store conversion rate.

As shown in the image below, make a note of the number of sessions Added to Cart, and Sessions converted.

Use the formula to calculate the Abandoned Cart Rate:

$$[(\text{Added to Cart Sessions} - \text{Sessions converted}) / \text{Added to Cart Sessions}] * 100$$

In the image below, the formula will be:

$$[(994 - 430) / 994] * 100$$

Which comes to: 57% Abandoned Cart Rate! Yikes!

Online store
conversion rate

[View report](#)

3.45%

↑ 24%

CONVERSION FUNNEL

Added to cart 7.97% ↑ 17%
994 sessions

Reached checkou 5.17% ↑ 54%
t
645 sessions

Sessions convert 3.45% ↑ 24%
ed
430 sessions

And 'Yes' Tidio is easy to install & set up for Shopify & Wix stores (and most other 'big name' eComm platforms) to dramatically reduce your 'cart abandonment'!

Note: Make sure to check out the bonus training video we've included at the end of this guide. **'How To Reduce Your Forms And Shopping Cart Abandonments Using Chatbots!' (in 20 minutes or less)**

We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>

#3 – Conversational Landing Pages

Traditional static landing pages have been around for over 20 years and are becoming less and less effective. (Have you noticed this trend in your business?)

Today's customers want answers fast. They want the opportunity for instant engagement, connection, & conversation. (Just like you do when you are online, right?!)

Think about it; when someone clicks on an ad or a link in an email, they most likely want to connect with your brand.

Your marketing message has captured their interest and now they want to know more.

You already know that in such a situation a static landing page simply won't cut it.

Your potential customers increasingly don't want to dig through lengthy copy to find the answer to their questions anymore.

They want their questions answered quickly.

Enter the alternative to a traditional landing page – A conversational landing page (sometimes referred to as a landing chat page too.)

In the simplest terms, it's a landing page with a chatbot instead of an inquiry form, like this:

Just like a landing page has different sections for 'Benefits', 'Inclusions', 'Pricing', 'Testimonials' a landing chat page with a chatbot set up can do the same thing plus WAY more.

Set up a chatbot that quickly explains the product then offer a few options like; 'how much', 'why choose this product?', 'see what our customers say', or even set up FAQs like 'what about [specific aspect of product]'.

Create answers for every question and let a chatbot offer up those answers instantly instead of forcing the customer to search for it in a sea of landing page copy.

And then if they STILL didn't find their answer you can step in directly via live chat or collect their email and answer their question soon after.

I mean, how cool is that?!

PRO TIP: Tag the user so that next time they visit your site offer up a discount code. OR just offer them a discount if they've spent longer than 5 minutes on the page to speed up the conversion.

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

Also, set up an email drip campaign to help build upon their interest.

In Summary

Yes, I know this all may seem a bit overwhelming and that I am biased towards Tidio. And that's because I am.

I am biased because when it comes to technology I want to always provide the very best information, products & services to my audience & clients and after searching for months and trialing what felt like hundreds of live chat options I could not get past Tidio. I even tried to ignore it and just used some of the more popular options.

But nothing beats a chat platform that:

- 1:** Doesn't drive users away by bloating site loading speed.
- 2:** Allows for clear communication across multiple platforms (including email).
- 3:** Has the greatest ability to create simple but powerful and intuitive chatbots than I have seen.

(And we haven't even spoken about all the integrations)

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

Tidio has definitely been designed for people who want their website to work for them. And since implementing it on our own site plus many other websites we have seen leads, conversations, and conversions grow exponentially!

Is chat for every business?

Honestly, I'd say yes!

Chat is helpful for all types of online businesses out there that want to 'up their game'.

Businesses that are headed by smart, savvy business owners who want to utilize current 'modern day' communications platforms that most individuals online these days actually expect & are comfortable using.

Bottom line...

More conversations = More conversions = More Sales!

Now, just imagine what you could do!

Cheers!

Mark Huber

'Quick Start' Guide

"How To Add Tidio Chat & Chatbots To Your Website!"

Let's jump right in...

We use Tidio and are proud to offer this guide to help you get going fast with the most robust chat & chatbot platform available.

Why?

Tidio is a live chat platform that's boosted with chatbots to increase your sales & customer engagement even faster. Hands down we've found Tidio Chat to be the most robust & capable of all the alternatives out there. And believe me – we've tried all the top named platforms out there!

FYI: We are always proud to introduce **Tidio** to our audience through our 'affiliate link'. If you decide to upgrade your FREE forever account to one of **Tidio** paid plans it costs you no more. If you do purchase we may receive a small compensation for the 'referral'. You probably already knew that but we just wanted to be totally transparent & crystal clear on that!

Tidio live chat app currently powers up **over 60,000 of WP websites.**

From the technical point of view, users love Tidio app for being lightweight and simple. From the business side, for the range of benefits this platform has to offer.

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

How to Add Tidio Chat to your WordPress Website

Step 1

Log into your WordPress account and go to the Dashboard.

Dashboard section inside your WordPress panel

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

Step 2

Navigate to the Plugins section and select "Add New".

To add Tidio plugin, head over to the Plugins section on the left side menu in your WordPress panel

In this section, you can either:

1. Look for the plugin by typing "**Tidio**" in the search bar.
2. Or click here to [Download the plugin](#) from the WordPress Plugin website and then, upload it from your hard drive.

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

Find Tidio plugin by using the search bar, located on the upper right side

When you type in the app name, press **Enter** on your keyboard to let the WordPress look for it.

Tidio will be ready to install from the Plugin section

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

Step 3

Add live chat plugin by choosing it from the list. Ok, WordPress found the Tidio app. Time to hit the **Install Now** button.

Click on the 'Install Now' button next to the Tidio plugin in order to install it on your WordPress based website

You've got an app installed. Before we move on, make sure you click the **Activate** button.

You will see the 'active' button next to the Tidio plugin, once the Plugin will be activated

We help businesses double their onsite leads & sales fast through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>

Now, if you go back to your **Plugins** section, you'll see Tidio on the list.

Correctly installed Tidio plugin will be visible inside the Plugins section of your WordPress panel

Notice the **Deactivate** link. It means that the app is active and you can deactivate it anytime you need it.

Is there anything else left to do?

Well, it's time to **explore your new app!** Visit the Tidio [blog](#) to learn all the "What's" and "How's" about live chat, chatbots, and email marketing.

For technical help, take a look at the [Knowledge Base](#) or reach out to the amazing Support Team at Tidio.

Enjoy your new chat platform!

P.S. If you still have problems with figuring out how to enable the live chat feature on your WordPress website, let us know or try these troubleshooting steps from below.

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

Troubleshooting Tidio integration with WordPress

If you are not seeing the chat on your website immediately after adding it, please try the following steps:

1) **Open your website in a new incognito window** in your browser. If you are using Chrome, hit CTRL + Shift + N (Windows) or CMD + Shift + N (Mac).

2) **Clear your website's cache** – the process depends on the device and browser you are using; for a detailed, step-by-step guide on how to do that on most popular platforms, please visit www.refreshyourcache.com

3) **Disable the caching plugins** – if the chat is still not displaying on your website, please make sure that any caching plugins (W3 Total Cache, W3 Super Cache, etc.) are temporarily disabled. Their purpose is to keep your website's loading time as short as possible, however, this might hold off any changes made on your website. Disabling them for a minute should allow the chat widget to load properly; after making sure that it worked, feel free to enable your plugins again.

If you can't log in to your account using the plugin, you can try clearing the plugin data in the WordPress plugins section. This will allow you to log in again using your existing login credentials.

Clear account data button

We trust that you've enjoyed this 'how to' guide and that it will serve as a shining beacon to light the your path for more business leads & sales fast!

**We help businesses double their onsite leads & sales fast
through the power of chat messaging & conversational marketing.
<http://SuccessOnTheFly.com>**

Now, go get 'em tiger!
